## User Guide

# Basic Keyboard Navigation

To use the horizontal navigation bars, you must first **Tab** to the navigation bar you want to access. Once the bar is in focus the **Left Arrow** and **Right Arrow** keys can be used to cycle through the buttons in the navigation bar. To activate a button, use the arrow keys to get it in focus and then use the **Enter** key. To exit out of the navigation bar you can use **Tab**.

Additional navigation options are accessible through the button on the main navigation bar labelled *Tools* (or by using the shortcut from the list below). This toolbar has navigation different from the other toolbars. Since the toolbar is vertical, the **Up Arrow** and **Down Arrow** can be used to cycle through the buttons in the toolbar. Additionally, no other part of the page can be accessed while the toolbar is open. The **Escape** key can be used to close *Tools*.

You can cycle through the different page zoom options using the drop-down list labelled *Zoom* on the main navigation bar. Once it is in focus the **Up Arrow** and **Down Arrow** keys will cycle through the available options.

The check boxes in the find bar (accessible by the *Find in Document* button), can all be checked using the **Spacebar** once the checkbox is in focus.

For screen reader users, the PDF content can be accessed by either cycling through with **Tab** or by using the ARIA landmark for main. When the PDF content is in focus, you can use the **Left Arrow** and the **Right Arrow** to easily cycle through the pages in the document.

# List of Keyboard Shortcuts
